What is a battery energy storage system?

A battery energy storage system, or BESS, is a system that uses batteries to store energy for later use. With the advent of this technology, energy usage could see a complete transformation; allowing access to energy sources when needed while reducing our dependence on traditional energy sources from fossil fuels.

What is the business case for battery energy storage?

The business case for battery energy storage varies by application and use case. For 'prosumers' (producers-consumers), the payback period of a home energy storage system can be calculated based on the spread between the cost of producing and storing rooftop solar power and the cost of purchasing electricity from the local utility.
