

Huawei claims that in base charging mode, the power bank can fully charge both itself and a phone overnight. The package includes a 25cm USB-C to USB-C cable for wired charging convenience. Huawei's 5000mAh magnetic power bank supporting 25W bi-directional wired and up to 30W wireless charging hit the shelves in China, priced at 369 yuan (\$52).

The power bank comes with a built-in foldable stand, allowing you to prop up your phone for hands-free video watching or working while it charges. Huawei claims that in base charging mode, the power bank can fully charge both itself and a phone overnight. The package includes a 25cm USB-C to USB-C cable for wired charging convenience.

Power products include systems for indoor,outdoor,embedded,and Central Office (CO) applications. They include Distribution Power Systems (DPS) and hybrid power,as well as a site energy management system. Huawei telecom power products adapt easily to a variety of telecommunication networks.

The magnetic power bank boasts compatibility with various fast charging protocols like SCP,UFCS,and PD,ensuring seamless charging with a wide range of devices,not just Huawei phones. However,the magnetic aspect adds a layer of convenience specifically for Huawei users. Here's where things get interesting.

The magnetic feature comes into play when paired with Huawei phones that support wireless charging and utilize an official magnetic adsorption case (sold separately). This allows for a cable-free charging experience by simply attaching the phone to the power bank.

There is also a fast bank charger from the branded 66-watt charger (one bar lights up green) that takes about an hour to go from 1 bar to full! For those who need a turbocharged power bank for Huawei, take it. The only issue is that it is very glossy and quickly gets stained by hands.
