

New Delhi Solar Power System

How much solar power will Delhi have by 2027?

The Delhi government has announced plans to install 4,500 MW of solar capacity, including 750 MW of rooftop solar within the state and around 3,750 MW of utility-scale solar outside the state by 2027 under the new Solar Energy Policy 2023.

What is solar energy policy in Delhi?

This policy will apply to any solar energy generating system with a capacity of 1 kWp or more. It applies to all electricity consumers and entities that set up or operate solar power projects in Delhi.

Does Delhi have solar power?

Delhi has immense solar potential, as the region experiences over 300 sunny days. Why not use this sunlight raining down on us, and turn it into usable electricity that can power our building? However, navigating through policies and subsidies can be daunting, especially if you're new to the world of solar energy.

Which is the top solar company in Delhi?

Adani Solar is known for its largest solar power projects and innovative solar technology solutions. With a focus on sustainability and renewable energy, Adani Solar is rapidly expanding its footprint as one of the top solar companies in Delhi and across India.

How can consumers adopt solar energy in Delhi?

Consumers in Delhi facing capital constraints can access models under the Renewable Energy Service Company (RESCO) mode to adopt solar energy. One such model is the conventional RESCO model, where consumers enter into a power purchase agreement (PPA) with a solar developer/installer for a fixed period, typically 25 years.

Are there alternative options for solar energy in Delhi?

According to the latest guidelines issued by the Delhi Electricity Regulatory Commission (DERC), they would now have alternative options to access solar energy. Under the new regulations, consumers with limited rooftop space can opt for group net metering and community solar models.
