

Solar power supply system in Manchester UK

Where can I install solar panels in Manchester?

If you've been thinking of installing solar panels in Manchester, look no further than Project Solar UK Ltd. We are your one-stop shop for solar panels for domestic and commercial properties.

Who are Manchester renewables?

Here at Manchester Renewables we supply and fit all of Manchester with renewable energy products, from Solar PV Systems, EV Charging Points, Battery Storage and Heat Pumps. Our expert teams are all MCS & RECC accredited, providing you with the highest quality installations, using the best and most efficient systems on the market today.

What is energy for a sustainable and environmentally friendly Manchester?

Energy for a sustainable and environmentally friendly Manchester. We are committed to helping Manchester transition to zero-carbon lifestyles and help households save energy. The use of solar panels is one of the best ways of reducing the need for fossil fuels and any form of non-renewable energy.

Are solar panels a good way to reduce energy costs?

Solar panels are becoming increasingly popular across the UK while energy prices continue to rise, as solar panels can be a great way to reduce electricity costs. Yet one of the leading solar panel installers in Manchester. Cut energy costs, boost property value & power your home or business with clean, reliable solar PV systems.

What are the most common repairs to solar panels?

The commonest repairs to solar panels are to the inverters. If you are having a problem with your inverter, we have the expertise to diagnose and fix most problems. Inverters do come with a warranty, but with this being the hardest working part of a solar panel system, it can begin to fail early, and in time.

What types of EV chargers do Manchester renewables provide?

At Manchester Renewables we provide all types of EV Chargers, supplying and fitting all models from domestic 7.2KW to commercial 3 phase 22KW chargers. The Battery Storage allows you to store the excess energy your system is producing. This means it isn't going back on the grid during the day and is ready to use when required.
