

# Vietnam communication base station wind power project

How many offshore wind power projects are there in Vietnam?

To date, that is through May 2025, about 150 onshore wind power projects (with a capacity of 8,000 MW) have signed power purchase agreements with EVN. In addition to these onshore wind projects, Vietnam has a plan to develop offshore wind power projects (" OWPPs "). Vietnam has significant potential to generate energy from offshore wind.

Is Vietnam building a roadmap for offshore wind power development?

Vietnam has been building a roadmap for offshore wind power development which requires a long-term process, thorough preparations in human resources, infrastructure, and especially a clear legal framework.

What are the major wind power projects in Vietnam?

Significant wind power projects currently underway include the Phu Cuong Soc Trang Offshore Wind Farm, the La Gan Offshore Wind Farm, Bac Lieu Wind Power Phase III, Hoa Binh 5 Wind Power Plant, and the Mui Ne Wind Farm. What's next?

Can Vietnam generate energy from offshore wind?

In addition to these onshore wind projects, Vietnam has a plan to develop offshore wind power projects (" OWPPs "). Vietnam has significant potential to generate energy from offshore wind. This is especially true in the southern regions, including the South, and South Central Coast.

What is the largest offshore wind project in Vietnam?

This is one of the largest offshore wind projects in Vietnam, being developed by Mainstream Renewable Power in collaboration with local partners. Located off the coast of Soc Trang province, the project has a planned capacity of up to 1,400 MW. It will be developed in multiple phases, with the first phase expected to provide 400 MW of capacity.

Who makes wind turbines in Vietnam?

Siemens Gamesa, a major global wind turbine manufacturer and project developer, has a strong presence in Vietnam. The company supplies wind turbines for several onshore and offshore projects and provides maintenance and technical support.
